## ABOUT ME

My name is Theo, and I study at Tullängsgymnasiet in Sweden in the Technology Program with a focus on Information and Media Technology. I began programming at 12 and have since gained experience in Roblox game development, where I enjoy creating fun projects and challenging myself with complex coding problems.

Through my studies, I've also built skills in programming, web development, web design, and digital communication. Creativity is an important part of my work, and I like exploring new ways to bring ideas to life—often inspired by my interest in video games.

This is my portfolio, where I showcase some of my best projects.

Welcome!
